

# Packaging Solutions

## Support, Expertise, Flexibility

**Because** your projects will become ours,

**Because** you are looking for quality, reactivity, mastered and ecological responsible solutions

**Because** you are expecting for customized and innovative answers that fit the size of your company

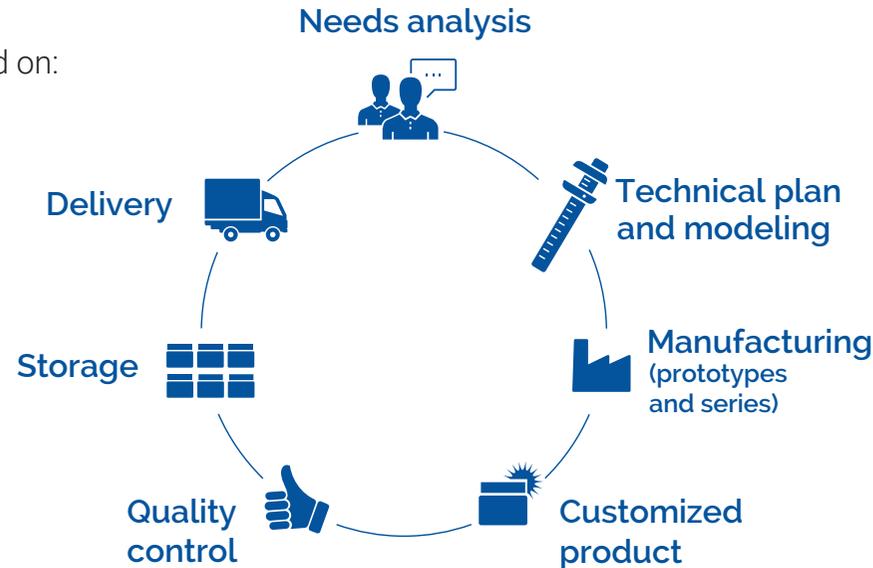

We listen to you and provide you with answers based on:

- More than **25 years of experience** in packaging (jars, bottles, tubes and accessories)
- A real **mastery of manufacturing techniques** (glass and plastics) and finishing systems
- A **constant search** of reliable and innovative solutions
- A **knowledge of the qualitative requirements** of cosmetics and parapharmacy
- An **environmental-friendly engagement** to limit waste and integrate the **circular economy**.

## Full packaging solutions

We propose:

- **Small and large series**
- **Phased deliveries** if needed

*From needs analysis to delivery, from design to manufacturing, the Embalforme group offers you a solution combining creativity and cost control to realize your packaging ideas.*

	●	30 parf	FEA 15	67	36*36	94	flp-ven30

# OPALE

Collection

## Jar in opal glass: a light barrier!

We control the complexity of the production of the **OPAL** glass collection. This specific glass has the role of a barrier to UV rays. It reflects the notion of whiteness and freshness desired by cosmetics and pharmaceuticals.

Jar	Bottle	ml	mm	mm	mm	g	Reference
●		200	GCMI 89/400	60	92		pot-opa200
●		50	GCMI 58/400	41,6	62	128	pot-opa50
●		30	GCMI 51/400	42,2	53,2	108	pot-opa30

# ACCESSORIES

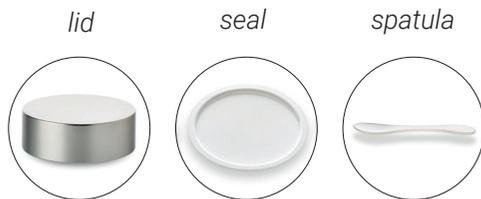

## For a full product

Whatever the jar or bottle selected, we have your capping solution.

### FOR THE JARS

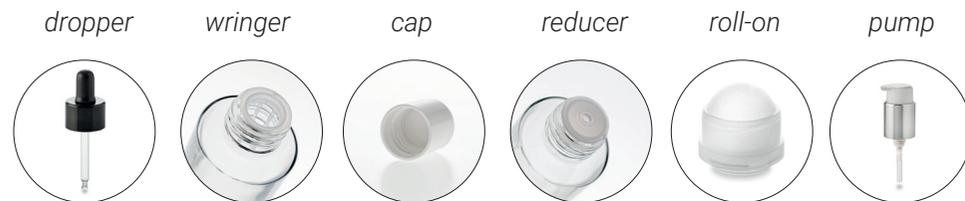

To finalise your jar, we offer urea, polypropylene, aluminium sheathed lids.

Complete with a spatula and a seal.

### FOR THE BOTTLES

Cap, pump or dropper? metallic or not? With teat or push button, the droppers allow a precise dosage of your formula.

# FINISHING

## It's all in the details !

In small or large quantities, we offer finishing according to your expectations.

- **The frosting** is a glass attack process to decrease the transparent effect and make it more satiny, opalescent.
- **Lacquering** on the glass enriches its appearance by a spray system. The spectrum of colors (gloss, matt, degraded, pearly) is very large.
- **Silkscreen** sprays your decorations by depositing the colors one after the other through silk screens (stencils) on glass or plastic jars and bottles.
- **Pad printing**, applied by an ink pad system, avoids printing difficulties.
- **Hot stamping** is the fixing of a gold, silver or metallic ribbon in all colors. Fixing by heat..
- **The metallization**, carried out under vacuum by spraying, gives to glass and plastic supports a rewarding metallic appearance. It is easily used for capping systems.
- **Aluminium sheathed**: thanks to the thickness of galvanised and polished aluminium, the sheathed cap and droppers can finalize your most luxurious products.
- **Logo engraving**, applied on a PP or aluminium sheathed cap, identifies your brand immediately and on a sustainable way.
